

モーター回転方向  
← 排気

Figure 1 is a top view diagram of the motor assembly. It shows a central motor with a gear on its output shaft. The gear is meshed with a larger gear on a central shaft. Four blades are mounted on this central shaft, each with a curved shape and three small circles. The blades are arranged in a cross pattern. A dashed line indicates the motor's rotation direction, with an arrow pointing left and the text "排気" (Exhaust). The entire assembly is enclosed in a circular frame.
